

- **Use of Data Analytics and link with its process in planning a trip.**

1. Plan: We first decide the destination and duration of the trip.
2. Prepare: Preparation of budget for the trip and how to get the money for the expenses of the trip.
3. Process: Check for the flights, train, bus ticket price, travel agencies and their costs, places to visit, places to accommodate, and other bookings in the desired destination during the fixed duration and prepare a list.
4. Analyze: Compare all the expects like cost of all listed accommodations and all other bookings and then make final decision where to stay, what places to visit, which travel agency would be better.
5. Share: Now communicate your idea with all the bookie and complete all the necessary bookings which supports the budget of the trip.
6. Act: Pack the bag and go for the trip.
